

# Green Careers

Amended 14 March 2023

## Discuss in pairs

Which environmental issues are most important to you?

*(You could consider issues such as global warming, renewable energy, plastic pollution, sustainable fashion, habitat destruction, toxic waste .... but don't be limited by this list)*

- Choose one issue and share with your partner why it's important to you
- How do you address this issue in your everyday life?
- How could you address this issue in your career?

# Where are green jobs available?

- Protecting plant and animal species
- Understanding planet earth
- Reducing the impact of human activity
- Encouraging green lifestyles
- Advocating for the environment
- Increasing public awareness
- Green innovation
- Greening our communities
- Protecting public health

# How green is that career?

## Sample career: chef

Job task: controlling and ordering stock and inspecting it on delivery

Impact on the environment: out of season ingredients imported from other parts of the world have a large carbon footprint

Adjustment: prioritise ordering local and, where necessary, interstate Australian produce that's in season
