

Morrisby take your data privacy seriously and our systems and processes make security central.

Security at heart

Morrisby is registered with the Information Commissioner's Office as an organisation that processes personal data under number Z5657144.

All personal data is stored securely in accordance with the EU General Data Protection Regulation (Regulation (EU) 2016/679) (GDPR).

In recognition of our efforts we have achieved Cyber Essentials Plus certification.

Key Facts

- ✓ ICO registered
- ✓ GDPR compliant
- ✓ Cyber Essentials Plus achieved
- ✓ Secure MIS connection with Groupcall

Secure Platform

Morrisby uses the highly secure Microsoft Azure and UK Servers hosting platforms. In addition, patches and updates are applied promptly and regularly; we use tightly configured Firewalls; virus and malware protection; strong password policy for all employees and website user accounts are locked out after too many login attempts.

On top of this we use specialist third party security companies to help ensure a high level of security,

including: Automatic daily threat detection, Regular penetration tests and a managed SIEM provider that actively monitors Morrisby's network 24/7/365 for intrusions.

Our hosting secures data in transit and at rest, including encryption for data, files, applications, services, communications, and drives. Support for and use of numerous encryption mechanisms, including SSL/TLS, IPsec, and AES. Configuration support for BitLocker Drive Encryption on VHDs that contain sensitive information.

Secure MIS Integration

Morrisby use the Groupcall Xporter on demand (Xod) system to streamline the administration of all Morrisby products. Using the latest cloud technologies, Xod provides a secure interface to your MIS for us to access – once you provide explicit permission to do so.

Groupcall securely transfer millions of pieces of data every day so naturally take security extremely seriously. As an ISO 27001 and ISO 9001 accredited company they adhere to strict rules to ensure your data is not at risk.
